Compliments of
Miss Emma V. White
MY THREE WARRANTS

1. I Warrant Your Remittance to Reach Me if sent by either postoffice or express money order, bank draft or registered letter, but by no other method. You may select extra flower seeds in packets to the amount of the cost of sending money by any one of these methods. If you remit by stamps or silver, it will be at your risk. If stamps are sent use one or three cent stamps, and do not stick them to your letter.

   It is comparatively safe to send small amounts of silver, but it should be sewed between pieces of blotting paper or cloth.

   As by new bank rulings a collection charge is made on most checks, if you remit by personal check, TEN CENTS MUST BE ADDED.

2. I Warrant My Seeds to Reach You, provided I receive your order. If you do not receive them promptly, please notify me not later than two weeks after the date you sent order, and give date and enclose duplicate, of which you should always retain a copy. You should receive your seeds within two or three days of the actual time it takes the mail to come and go between the two points, as I aim to fill all orders within 24 hours of their receipt, except plant and bulb orders. See Bulb and Plant pages in regard to these deliveries.

3. I Warrant My Seeds to be Good.

   No one can promise that seeds will grow, nor do I, as so much depends on conditions. I know by actual testing that my seeds are good, and if any failed to grow for you last year and you think that the failure is due to lack of vitality in seeds and not to some other cause, you may feel at liberty when placing your order with me this year to include such varieties. Seeds of Greenhouse Plants, which generally require special care, are excepted from this offer to replace. A new order should accompany an application for seed to be replaced, and please refer to date or number of last spring's order in which it was included.

Promptness is My Motto

Try me. If you do not get your seeds it is from one of the following reasons:

Why You Do Not Receive Your Seeds

a. No address given. I receive many orders without signature or postoffice. Be sure to sign your name and give name of office.

b. Insufficient address. If there is mail delivery do not fail to give street or rural delivery number.

c. Indistinct writing. Take special pains to write name and postoffice distinctly.

d. No title given. Ladies should always give title, Miss or Mrs., especially if initials only are signed.

e. Fault in Postal Service. Sometimes letters fail to reach me, and sometimes packages, even when properly addressed, are lost or miscarried in the mails.

CHINESE WOOLFLOWER

"The most admired flower on our place," is the universal testimony regarding this new and unique Feathered Cockcomb. It grows 2 to 3 feet high, each branch covered with a great head of rich crimson flowers having the appearance of soft, silky wool. Very effective in beds and borders, splendid for cutting as it lasts many days, and dried it is a valuable addition to the winter bouquet. Blooms continuously until cut off by frosts. A much longer blooming period is obtained by starting seed indoors. Do not sow outside until settled warm weather. Pkt., about 40 seeds, 10c; 2 pkts., 17c.

RAINBOW MARVELS

Or Rainbow Hibiscus. Second only to the Wool Flower in attraction is this new strain of Mallow Marvels, with their scores of colors, from white to dark rose, some with dark velvety centers, others in solid colors. You will find a row of these tall plants, with their immense showy, hollyhock-like flowers, marvels indeed, nothing in the garden more attractive. 4 to 6 ft. Pkt., 25 seeds, 10c; 2 pkts., 17c.

NEW RAINBOW SUNFLOWER

These new Rainbow Sunflowers containing many novel forms and shades, are the result of blending three distinct types of Hybrids, combining the good points of all. The colors run from all shades of yellow through many combinations with brilliant reds and oranges. The plants grow 5 to 8 feet high, branching profusely, each plant bearing scores of beautiful flowers 5 to 8 inches across on long, strong stems. Pkt., 15 seeds, 10c; 2 pkts., 17c.

FANCY RAINBOW CORN

Another novelty worthy a place in the Border. With its variegated leaves, striped with bright green, silvery white, reds and yellows, it is a highly ornamental and effective foliage plant. 5 ft. Pkt., 20 seeds, 10c; 2 pkts., 17c.

One packet each of the above four Border Plants for 30 cents.

CINNAMON VINE BULBS

Beautiful leaves, dainty flowers, exquisite perfume, grows in shade or sun, wet or dry. No insects ever trouble. No winter harms.

A charming climber that will quickly surround your arbor, window or veranda with a wonderful profusion of vines covered with handsome, glossy, heart-shaped leaves, while its clusters of delicate white flowers emit a delicious fragrance. Very Hardy, thriving almost everywhere, though perhaps not so well adapted to the extreme north. The first year the vines run about 10 feet, but eventually reach a height of 25 to 40 feet. See my "Culture of Flowers" for directions. Two or three roots, one foot apart, on each side of a door or window will quickly cover it. They do best in a warm, sunny location, though thriving almost anywhere.

Extra Quality—Sure to grow. Price, 1 strong root, 5¢; 3 roots, 12¢; 6 roots, 21¢; 12 roots, 40¢; all postpaid.

FLORICULTURE GUIDES

"CULTURE OF FLOWERS FROM SEED." My booklet of practical directions, with special instructions for Asters, Pansies, Sweet Pea, Roses and Greenhouse Seeds, free, if asked for, with an order for flower seeds of 25¢, or over. Otherwise, the price is 5¢.

"HOME FLORICULTURE." A guide to growing seeds, plants and bulbs in the house or garden. A book of 175 pages, all about the puzzling things a flower lover wants to know, gathered from the author's experience of 25 years. Price, paper-bound, 29 cents, postpaid.

My Leaflets on Aster and on Vegetable Seed Culture are free with an order for each, respectively, of ten cents or over.

TWO BULB NOVELTIES

The Wonderful Dasheen. This is allied to the Caladium, or "Elephant's Ear," but, growing faster and making more leaves than the Caladium, it is more valuable as a foliage plant. Also it may help out the high cost of living as the tubers are edible and very palatable, cooked like potatoes, while the leaves are said to be a good substitute for spinach and the stems for asparagus. If given rich soil and plenty of moisture it is hard to beat. The small-sized bulbs, if started inside, will make plants 3 or 4 feet high. Small bulbs, 7¢ each; 3 for 18¢; 6 for 30¢; Large bulbs, 12¢ each; 3 for 30¢; 6 for 55¢; all postpaid.

THE NEW MEXICAN TUBEROSE

The New Mexican Tuberose. A beautiful variety, with tall stiff stems, pure white, single flowers of delightful fragrance. Each bulb sends up 5 to 15 flower stalks, showing a mass of white until cut down by frosts. If a stalk is cut when the first flower opens and put in water, the flowers increase in size and whiteness, and keep for a week or ten days. They need special warmth and should not be set out until settled warm weather. By starting them in the house the blooming season will be prolonged. In the south and south central states they may be put into the ground in early spring and left out over winter. In the north treat bulbs same as gladiolus bulbs. Nice large bulbs, 8¢ each; 3 for 20¢; 6 for 35¢; 12 for 65¢.

FLORAL ART PICTURES

Receiving so many compliments for my dainty and artistic catalog covers, I have printed a quantity of late years without lettering. The dainty colorings and fine workmanship give them a value as art studies, and, properly framed, they will adorn any wall. I offer as follows: Double Rose Study, 1918 cover; Nasturtium Study, 1917 cover; Rose Study, 1916 cover; Clematis and Hawthorn Study, 1915 cover.

Price, 7¢ each; any 2 for 12¢; the 4 for 20¢, all postpaid.

"HIT OR MISS" FLOWER GARDEN
This is made up of what I have left over of last year's seeds that upon testing were found to germinate, together with a large quantity of fresh seed. A customer says, "The Hit or Miss package is not correctly named, for I am sure it never misses something worth while. It is real fun watching to see what will come, and I often get pleasant surprises." Sift out the fine seed so that it may be planted under different conditions from the coarser seed. Large packet, 4c; oz., 10c.

LYMAN'S GRIMM ALFALFA
I have discovered that there is a decorative mine in this now common forage plant. The long, graceful intensely green sprays and pretty flower heads in varying shades of blue are most valuable to one who likes to have dainty vases and baskets about; also desirable for church decoration.

Just a word as to the variety known as Grimm. Being a personal friend of Mr. Lyman, who originally introduced the seed for general use, I know that it is absolutely pure and true to name. But why use Grimm, especially as the price is higher than for other varieties? Because (1) It is the hardest variety known and is the only safe kind to sow in Northern latitudes. (2) It requires less seed per acre on account of its large stooling habit. (3) It yields a much larger percentage of persistent plants, and (4) it holds its stand and does not thin out after the first severe winter. The great productiveness of Alfalfa is well known, always yielding three cuttings and often four in a season. If you have used some unsatisfactory sort and your field is patchy, scatter the Grimm seed and get a solid stand. For a new planting use 10 to 12 pounds per acre. For the home garden it is pretty to edge the Perennial Bed, or, sow a quantity in some odd corner or wherever you want a perpetually green spot and have a never-failing source from which to gather your decorative green. Trial pkt., 4c; oz., 10c; ¼ lb., 20c; 1 lb., 75c, all postpaid; not prepaid, 1 lb., 65c; 10 lbs., $5.00 to be sent by express or mail, as directed. If by mail, include postage on eleven pounds weight.

LAWN GRASS SEED

My lawn grass mixture is the one especially recommended by the U. S. Dept. of Agriculture and is
the very best that can be made. If directions are followed, it will give a soft close sod of uniform texture
and rich emerald green. Allow 1 lb. for 350 to 400 sq. ft.; 5 bu. per acre.

Directions: To secure the best lawn, the soil should be well drained and deeply plowed, and fertilized
with well-rotted manure or some good commercial fertilizer. Harrow or rake it as fine as possible and roll
before the seed is sown. Sow as early in the spring as possible, or in September for fall sowing. For further
instructions see Culture of Flowers, p. 31 (free if asked for with an order of flower seed of 25c or over).

and mellow to a depth of three inches. Sow seed and cover lightly
with some of the mellow dirt.

ACACIA BAILEYANA

Beautiful, half-hardy trees or shrubs with finely lacinated foliage
and long racemes of small yellow flowers. In the North they can be
used as conservatory plants only, but are perfectly hardy for the
Southern states. Before planting soak seeds in hot water until they
swell. The hard, shiny black seeds, either alone or combined with
beads, make lovely necklaces. For this purpose they must be soaked
in hot water (near boiling) until they swell. They should be strung
as they swell and become soft. If all do not swell at once, keep the
rest soaking in the hot water. After drying, the seeds go back to
their natural size and color. One-half ounce makes a nice necklace.
Pkt., 5c; ½ oz., 10c; oz., 15c; ½ lb., 50c.

BEST TWENTY-FIVE GRANDIFLORA SWEET PEAS

The Grandiflora Sweet Peas (the standard sorts) do not get so much advertising nowadays as do the Spencers, but they are indeed wonderfully fine, and one need not buy the expensive Spencers in order to have the best results, either as to quality or quantity of bloom. It is well known that the Grandifloras are better germinators and more prolific bloomers, and the time is far off when they will be superseded by the Spencers. In the following list, I offer the cream of this type, such as Sweet Pea lovers cannot afford to be without.

Price of any sort on this page: Pkt., 70 seeds, 5c; any three pkts., 12c; ½ oz., 8c; any four half ounces, 25c; 1 oz., 12c; any two oz., 20c; any four oz., 35c.

SWEET PEA MIXTURES

BEST GRANDIFLORA VARIETIES, MIXED

This is my choicest mixture of Sweet Peas and cannot be surpassed in variety or richness of color or size and substance of bloom. I make it myself and include in it not only the 25 varieties described on page 14—a proved list of standard sorts, the very best in cultivation today—but a number of other named varieties and also a large percentage of the popular new wavy Spencer and Unwin types, thus making it thoroughly up to date. Mrs. Coryell, of Adrian, Mich., says: "From one pkt., of your Grandiflora Sweet Peas I had a nine-foot row, and though grown on ordinary soil, I gathered on July 29 a bouquet of 185 stems, with 21 varieties. Can any one beat this record?" Pkt., 70 seeds, 5c; oz., 12c; 2 oz., 20c; ¼ lb., 35c; ½ lb., 60c; 1 lb., 51.15c.

GIANT CALIFORNIA SWEET PEAS, MIXED

A very choice mixture of only large-flowering types containing a large proportion of light colors with enough dark for a contrast. This includes also what I have left over from my choice named varieties. Every one knows that Sweet Pea seed retains its vitality for several years, so this is practically as good as if all were fresh seed. Pkt., 100 seeds, 4c; oz., 8c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 75c.

EARLY-FLOWERING, OR CHRISTMAS SWEET PEA

The earliest-flowering sorts, blooming in about twelve weeks from sowing, called "Christmas" Sweet Peas because used by florists for forcing in their greenhouses, furnishing bloom for Thanksgiving and Christmas from seed sown about Sept. 1. But they are more used for early spring planting and every one should have at least a short row and thus get flowers from three to four weeks earlier than from the standard sorts. All who grow to sell should grow them, as early blooms bring best prices. The plants begin to bloom when about a foot high and never attain a height of more than 3 or 4 feet and are often grown without support.

Price, pkt., 50 seeds, 5c; any 3 packets, 12c; ½ oz., 10c; oz., 15c; any four half ounces, 35c.

Mrs. E. Wilde. Bright rose, very early.
Mrs. F. J. Dolansky. Light rose-pink.
Mrs. Wm. Sim. Best early salmon-pink.
Christmas, or Early-Flowing, Mixed, includes the above and all other shades yet developed in these remarkably early kinds.

Collection Early-Flowing Sweet Peas. One packet each of the ten varieties, 35c.

CALCEOLARIA GRANDIFLORA

A splendid climber for the porch or trellis. It grows rapidly, has very pretty foliage, and curiously shaped, canary yellow flowers with fancied likeness to a bird with outstretched wings. I recommend it as one of the most desirable vines to be obtained from seed. Annual. Pkt., 20 seeds, 5c.

SHASTA DAISY, ALASKA

One of Luther Burbank’s many important contributions to the floral world. It is perennial and absolutely hardy, and blooms somewhat the first year from seed. The flowers are white, with yellow center, extremely large and graceful, freely produced on long, stiff stems, splendid for cutting. Alaska is the largest and best variety 2 feet. Pkt., 35 seeds, 6c.

ENGLISH DAISIES (Bellis Perennis)

No flower has more often been the theme of the poet than the dainty English Daisy. They bloom the first year; with protection the plants live over winter, their blossoms being the first to greet one in the spring.

FOUR O'CLOCKS

Four O'Clocks should be grown for the children if for no other purpose, from which they may pick freely, they so enjoy the bright colors and sweet odor. In a large garden they may be used effectively to border walks, or as a background for lower-growing plants. Mixed. 2 to 3 feet. Pkt., 25 seeds, 5c; 2 pkts., 8c.

JAPANESE KUDZU VINE

A fast-growing hardy climber. The first season it grows 10 feet, and later often makes a growth of 50 feet in a season. The flowers are rosy-purple and pea-shaped. In the North the top dies in winter, but in the South it becomes woody. For vigorous growth and fine shade it is unsurpassed, but is not hardy enough for the extreme north. Pkt., 20 seeds, 5c.

JAPANESE HOP

For a rapid growing vine nothing is better than the Japan Hop. The foliage is luxuriant, the leaves being smaller and more delicate than those of the common hop, and curiously marked with silvery and yellowish-white streaks. Pkt., 5c.

RAINBOW CORN (Japanese Maize)

As beautiful and decorative as the Dracaenas. In some the leaves are variegated like those of the striped grass, in others there will be broad stripes of crimson, yellow, white and other rainbow colors. Nothing like it for decorative purposes, either for the garden or for cutting where large effects are desired, or in the center of a tropical bed, or a screen against a fence, or a background in a border. 4 feet.

I offer a mixture of several choice strains, including Gloxiniae-flora, rivaling the gloxinia in shadings and markings, and Maculata, a charming new spotted strain. Splendid mixed. 3 to 5 feet. Pkt., 400 seeds, 4c; 1/8 oz., 12c.
GYPSOPHILA “Angels Breath”

They much enjoy the striped and odd-shaped fruits—Calabash, Bottle, Dipper, Dish Cloth, Hercules Club, Nest Egg, Sugar Trough, and many other sorts. Mixed. Pkt., 50 seeds, 4¢; large pkt., ½ oz., 12¢.

“BABY!” ROSE

Rosa Polyantha Multi-flora Nana, or “Little Midlet”, or Baby Rose, is a charming hardy little plant about 10 inches high, bearing clusters of minute roses only an inch across, double, semi-double, or sometimes single. The many flowered clusters look like a mass of double crab-apple blossoms. I have taken pains to secure the best seeds and true to name. Not all the Rosa Polyantha seed is of this dwarf, early-flowering variety. It blooms the first season, though not attaining perfection until the second year. Pkt., 55 seeds, 8c.
LARGE-FLOWERED PETUNIA

Giants of California, Double Mixed. Mrs. Wadsworth, a New York customer, says: "The Double Petunias were the handsomest I ever saw. I had 15 varieties and took first prize at our fair." My mixture contains the very best strains of two expert growers who have devoted years to their development. Not all come double, but the seed will give a good percentage of deeply fringed, double flowers, in the brightest colors and most beautiful tints. Pkt., 60 seeds, 12c; 2 pkts., 20c.

Double White Petunia. Very double and beautifully fringed. Pkt., 50 seeds, 12c.

Giants of California, Single Mixed. This mixture will give as handsome Petunias as any on the market. Some will measure four or five inches across, the corollas being ruffled, fringed or fringed, with extremely deep and large open throats. They appear in many shades and combinations, striped, blotched or solid in color. Splendid mixed. Pkt., 150 seeds, 8c; 2 pkts., 14c.

"Fluffy Ruffles." A superb strain of single Petunias, the most deeply ruffled and fringed of all. Exceedingly delicate and graceful. Mixed. Pkt., 100 seeds, 8c; 2 pkts., 14c.

**POPIES**

**SHIRLEY POPPIES**

Acme Mixture. In an effort to offer the very best in this most popular poppy, I have tried the strains of several noted growers, and have prepared for this mixture a strain that cannot be excelled. Nothing makes a more beautiful display, either in the garden or for decorating, than the Shirley Poppy. They range from pure white and delicate pinks to rich, gaudy hues—all of so sheen a lustre as to be called Silk, or Ghost Poppy. One of the prettiest table decorations I have seen was a dainty basket of Shirleys. If picked before the sunshine strikes them, and base of stems dipped in boiling water, they last two or three days. No better assortment than mine. Pkt., 300 seeds, 4c; ½ oz., 15c.

SELECT LIST OF BULBS AND PERENNIALS

IMPORTANT NOTICE

Bulb and Perennial Department. Having made arrangements with one of the largest Peony and Iris nurseries in the United States to furnish the bulbs and plants listed on pages 42-46, inclusive, I am prepared to give you splendid expert service, better than if I grew the stock myself. They grow over 200 varieties of Peonies, and nearly as many sorts of Iris, and if you should desire others not in my list I will make quotations.

Separate Department. This includes pages 42-46 only, and is entirely separate from seed and plant departments. Make out order in a separate list to avoid mistakes. Also do not order less than 15c from this list, as the things are sent separate from seeds and other plants, and cost of postage and packing is more than they come to on 5 and 10-cent orders.

Time Limit. Peonies and Phlox cannot be sent later than about May 1; Iris, May 15; Miscellaneous Perennials, May 15; Cannas, Dahlia and Gladioli, June 1. Late orders for these should be in my hands at least a week before the dates given. I am also prepared to make fall delivery of Peonies, Phlox, Iris and the Miscellaneous Perennials mentioned on page 46.

Deliveries. Unless otherwise requested, orders received before April 1st will be placed on file to be sent as soon thereafter as possible. Orders received after April 1st will be attended to in rotation as far as possible. Fall deliveries may be made from September till frost, but it is well to set out Iris in the early fall. Orders received too late for spring delivery will be held until fall.

Guaranty. Only No. 1 stock, well packed, will be sent, and I guarantee it to reach you in prime condition. If not all right please notify me within one week of receipt.

Postage. Prepaid in U. S. Canadian and foreign customers must add 10% of amount of order for postage.

CANNA BEDS

For Round Beds we recommend 19 plants for a 6-foot bed set 18 inches apart: 1 extra tall for the center, surrounded with 6 of another kind not quite as tall, with an outside row of 12 of another kind still shorter. Our selection, choice sorts, $1.75 for the 19 roots.

Long Beds. For a 12-foot bed made up of 9 tall ones of one kind for back row, and 9 shorter ones of contrasting colors for front row, our selection, $1.65 for 18 roots.

Effective Canna Planting. What is more effective than a well designed Canna bed? For this purpose they may be used alone, or grouped around the stately Castor Bean as a center; or used with other decorative plants for the outside row, such as Geranium or Coleus; or if something less expensive is desired, plants from annual seeds, such as ornamental Beet, Perilla, or Alyssum may be used.

NOTE.—I furnish dormant roots only. Spade into the soil a good coat of well-rotted manure, set so the eye is covered with about one half inch of soil, and press the earth firmly around the root. So planted they may be started with good results even as late as May 25. Warmth is necessary in starting the roots.

IMPORTANT NOTICE

This notice pertains especially to plants listed on pages 47-56, inclusive.

1918 Plant Prices not "Boosted." Although my expenses have increased at least 30%, I have made but little advance in my plant department, thereby not only sharing somewhat with my customers but hoping also to gain enough more patronage to cover additional cost. Will you not take advantage of my low prices?

Plant Deliveries. Plants are sent from nursery where grown. Unless a special time is mentioned, orders will be filled as soon as weather permits, generally during the first mild weather after their receipt, but not beginning before March 1. If not received, do not make inquiries before April 15. You will surely get plants in good season. If a special, early delivery is requested, plants will be sent at your risk.

Sizes of Plants. One-year roses and Bedding and House Plants are well established stock from 2 1/2-inch pots. Orders for these may be filled spring or fall. Two-year roses are from 4-inch pots. Orders for these filled to May 1. Shrubs and climbing plants are thirsty stock propagated the spring previous. These must be sent dormant, and orders for these items should reach me by the middle or last of April, also fall orders for shrubs will be accepted.

I Cannot Supply plants not listed.

Combination Prices not allowed on any combinations except as given.

I Guarantee All Plants to reach you in good condition. Any complaints must be made within a week thereafter.

My "Culture of Flowers" (free if asked for with an order for flower seeds of 25c or more) contains a valuable article on Rose Culture.

HYBRID PERPETUAL ROSES

OTHER CHOICE VINES

Akebia Quinata. Handsome foliage, perfectly hardy, fast-growing, producing large clusters of violet-brown flowers of sweet cinnamon odor, followed by showy, purple fruits. Not attacked by insects or fungi. Price, 15c; 3 for 40c.

Amphelopsis Veitchii, or Boston Ivy. One of the finest climbers for covering walls. It clings firmly even to the smoothest surface, with overlapping foliage, giving it an appearance of being shingled with green leaves, which in the autumn change to bright crimson shades. Perfectly hardy. Price, 15c; 2 for 30c.

Clematis Paniculata. It grows rapidly, is hardy as an oak, is never disturbed by insects or disease, and the foliage stays green long after other things have been killed by frosts. Covered in late fall with a sheaf of small white, orange-like flowers. Price, 20c; 3 for 50c.

English Ivy. An evergreen climber much used for covering walls and for cemetery work, also to cover graves where grass will not succeed. Not hardy in extreme north. Price, 15c; 3 for 40c.

HANGING BASKET OR VASE PLANTS

Price, 18c each; any 3 for 45c.

Wandering Jew

Foliage beautifully variegated purple, scarlet, yellow and white. Used for hanging baskets, vases or porch boxes.

Give shade in the summer, but full sun in winter, and less water than most plants.

Weeping Lanata

EVERBEARING STRAWBERRY PLANTS

(Sent with any shrubs you may order from page 55.)

The Everbearing Strawberries not only continue the strawberry season indefinitely, but their great yield is almost beyond belief, being almost three times as much as from the standard sorts. A trial plot of one square rod set May 1 produced 7444 quarts from July 23 to Oct. 23, and the final freeze caught them still bearing profusely. A nice little return from space that even the smallest garden might afford. The best two sorts are as follows:

Price of Everbearing Strawberries

Postpaid, 12 for 50c; 25 for 75c; 100 for $2.50.

By express at your expense, 500 for $10.00; 1000 for $17.50.

Superb. A strong, healthy grower, seeming to succeed anywhere. Berries are large, glossy, round, firm and of good quality. For large berries plant this.

Progressive. Ideal in hardness and fruit, generally considered the best variety. A great plant maker, and as it produces on runners, an enormous yielder. Fruit resembles that of the Senator Dunlap.
